

# “GIZMATIC”

The “Gizmatic” is Neway’s most efficient tool for refacing valves by hand. The “Gizmatic” — so named because it combines two earlier designs, the “Gizmo” and the Hand Valve Refacer (HVR), into one tool — features a crank style lever which turns the blades against the stationary valve face. This crank provides the operator with enough leverage to make the job effortless, while a second lever allows the operator to control the feed rate of the blades. The “Gizmatic” features soft jawed V-blocks which hold the valve stem securely in a vise while the cone, either 45° or 30°, automatically centers itself on the valve face. This unique tool offers a unique value in valve refacing (and deserves its unique name!).
